1. Purpose of This Report

This sample report shows how SA CoParents Align compares the independently provided perspectives of both parents. It identifies areas of alignment, differences in perspective, the child's identified needs, and neutral options for professional guided discussion. It is not designed to determine which parent is right or wrong. The names and answers in this sample are fictional.

2. What Both Parents Agree About

Strong Alignment - both parents indicated that:

- Both parents mentioned "emotional, Liam" when describing child's primary need.
- Both parents mentioned "both keep" when describing what is working.
- Both parents mentioned "between" when describing concerns.
- Both parents mentioned "stand" when describing desired improvements.
- Both parents mentioned "counselor, feelings, journal" when describing options you would consider.

3. Where the Parents See Things Differently

The Other Parent's Likely Concerns

Avery S.'s Perspective

Quinn may be concerned about labeling Liam's feelings too early.

Quinn S.'s Perspective

Avery may worry that too much focus on anxiety makes Liam more self-conscious.

Both parents agree that this subject matters for Liam. The difference concerns how the shared goal should be accomplished, rather than the underlying goal itself.

4. Child's Identified Needs

Alignment Before Agreement

You don't have to see everything the same way to begin working toward meeting your child's needs.

"We value the parenting system by how well it supports the child, not by how friendly the adults appear."
